Have you noticed how many of us are trapped
in soul-numbing patterns?

Do you struggle to understand why we continue
to abuse the planet that birthed us?

Do you wonder why there is so much
separation between us:
so much violence, depression and addiction?

Does your heart break when you observe the
anxiety and dullness in the eyes of too many?

We have birthed this **YES** through a course curriculum
we call “Awaken 101” where we invite students to
experience their lives as a true Hero’s Journey (sensu. Joseph
Campbell) using experiential learning grounded in questions,
truthspeaking, risk taking, experimentation, emotional
expression and contemplation.

In the workshop, we will also use these tools as levers for
self-discovery and consciousness expansion so that we, and
ultimately our students, might become ever-more self
aware and intimate with each other and
with our home, **Planet Earth.**
